

CALL FOR

EXTERNAL FORMATIVE EVALUATOR

Project [TESLA](#) (Virtual Reality as an Innovative and Immersive Learning Tools for HEIs in Palestine) is a project funded within the [Erasmus+, Capacity Building in the field of higher education](#). **Capacity-building Projects** are **transnational cooperation** projects based on multilateral partnerships, primarily between higher education institutions (HEIs) from Programme and eligible Partner Countries.

Tesla is currently in process and partnership is now launching **a call for an External Evaluator**.

The quality control is a constitutive part of the project so as to assure that objectives and activities are efficiently reached. This monitoring measure guarantees the quality of the results, methods, and procedures employed in the project cycle management and in the development of results as well.

In addition to the role of the Quality Control Committee, an external expert will evaluate the progress and success of the activities compared to the project indicators and will suggest actions aiming at improving the results' overall effectiveness. The evaluator will study and analyze data on the project in order to identify the achievement of results and their weaknesses.

Furthermore, the expert will produce reports on the project status and make recommendations.

This work package is coordinated by the PPU.

The terms of reference for the external expert selection can be downloaded from here.
